

PETITION TO THE HOUSE OF COMMONS

We, the undersigned citizens and residents of Canada, draw the attention of the House of Commons to the following:

Whereas:

- The Liberal government has unilaterally decided to reduce Canadian farmers usage of nitrogen fertilizer;
- Reductions and failing to use fertilizer has led to food shortages, currency issues and unrest in Sri Lanka;
- Farmers from the Netherlands have engaged in mass protests over proposed fertilizer reductions;
- Canadian farmers are dealing with many stresses including inflation, rising carbon taxes, tariffs on fertilizer and this Liberal imposed fertilizer reduction;
- Canadian farmers produce some of the most sustainable agri-food products in the world, and they're continually being asked to do more with less; and;
- Reducing farmers capacity and ability to grow food will directly impact food prices, food security and our supply chains.

Therefore we, the undersigned citizens and residents of Canada, call upon the Government of Canada to:

- 1) Stop all forced fertilizer reductions; and;
- 2) Support and cooperate with Canadian farmers so they have all the tools available to grow food, serve Canadians and feed the world.
